Affordable Classic

Normandy® offers discerning homeowners a custom hardwood shutter at an affordable price. Why compromise quality for price when you can have both? Enhanced design options make your shutter designing and customization decisions simple.

From Traditional to Trendy

For the ultimate brilliance and resilience, we use multiple sequences in prepping the wood surface for the finish – be it paint or stain. This necessary and labor-intensive process creates the most favorable surface, resulting in a uniquely grained and luminous finish. Normandy's wood grain characteristics are exceptional. With stain, the distinctive wood grain has an enhanced depth and character with the texture of the timber being defined. Like your shutters smooth? Our contemporary paints gleam on the satin polished surface. Whatever your personal style – warm and rustic or sleek and refined – you are sure to find the perfect match for your décor.

Distinctive Windows - Specialty Shapes

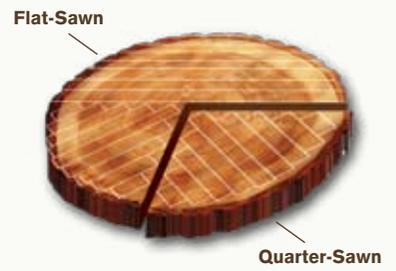

All windows are not created equal. The Normandy specialty collection includes shapes beyond the conventional square and rectangle. If you have arches, hexagons, sliding or French doors, or other unusual window openings – we've got you covered. Our specialty shutters can be crafted to fit virtually any window opening. Now, every window in your home can be dressed with a Normandy Shutter.

Quality and Value Unmatched

We employ the same time-honored woodworking techniques used by artisans of exceptional home furnishings.

Stability

Quarter-sawn louvers provide a tighter grain that results in durable louvers which resist bowing and warping.

Endurance

Multiple layers of wood are bonded together to bolster the stability of the core of the stile-making for a robust and hearty support system for your shutter panel.

Reinforced stile

Durability

Traditionally used in demanding furniture and building construction, mortise-and-tenon joints are designed to withstand the shear stress, and racking forces that occur when operating a shutter. This makes the mortise-and-tenon an ideal joint for shutters.

Mortise-and-tenon joint

Resilience

Prescription Wood Conditioning™, our patented wood drying technique, dries the wood to emulate the environmental conditions of the location where the shutter will be installed. This practice also reduces post-installation shrinking and swelling.

Keep Your Options Open

Options make the ordinary extraordinary. With Normandy shutters you can keep it simple or have it all. That's the beauty of making it your own!

- Hidden or offset tilt rod
- Double hung panels
- Café shutters
- Track systems
- Multi-fold panels
- French door cutout
