BY NORMAN SHUTTERS®

You Deserve the Luxury of Sussex Shutters

Discriminating homeowners deserve the opportunity to accentuate their windows with Norman Shutters, the finest shutters available. The luxurious Sussex line is nothing short of exquisite. Masterfully crafted from premium basswood and other hardwoods, Sussex Shutters are designed to beautifully complement any window in the most distinguished style.

Like any home investment, only shutters of exceptional quality will provide long-term value and increase appreciation. Norman Shutters ensures the beauty and durability of our shutters through the finest materials, handcrafting processes, advanced technology and quality control systems.

Exceptional Materials

The finest heirloom furniture is made with quarter-sawn wood to ensure generations of durability, and so are all Sussex Shutter louvers. In quarter-sawing, the wood is harvested from logs in a way that makes it less susceptible to inherent cupping, twisting and warping. This method gives the wood remarkable strength and stability.

Top, outside mount quarter sunburst panel with continuous frame; bottom, inside mount, both with existing molding, 3 1/2" louvers, with divider rail in Oak Mantel

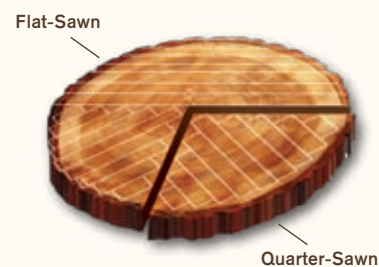

Timeless Craftsmanship

We employ the same time-honored woodworking techniques used by artisans of exceptional home furnishings.

Stability

Quarter-sawn louvers provide a tighter grain that results in durable louvers which resist bowing and warping.

Endurance

Multiple layers of wood are bonded together to bolster the stability of the core of the stile-making for a robust and hearty support system for your shutter panel.

Reinforced stile

Durability

Traditionally used in demanding furniture and building construction, mortise-and-tenon joints are designed to withstand the shear stress, and racking forces that occur when operating a shutter. This makes the mortise-and-tenon an ideal joint for shutters.

Mortise-and-tenon joint

Resilience

Prescription Wood Conditioning™, our trademarked wood drying technique, dries the wood to emulate the environmental conditions of the location where the shutter will be installed. This practice also reduces post-installation shrinking and swelling.

Color Inspirations™

Designer palette of 50 paints and stains optimize your design potential.

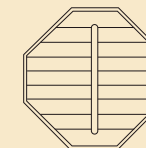

Choose from an assortment of classic stains and sophisticated paints. Can't decide on a color? Sussex Shutters can be custom color matched for any color inspiration. Whatever your preference, you are sure to find the perfect hue to complement your décor like nothing before.

Specialty Shutters

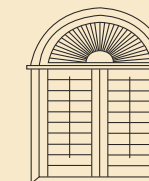

- Any shape, many with operable louvers and panels that open for window cleaning
- Track System Shutters – for sliding panel applications
- French Door Cutouts – for handle and doorknob access
- Exclusive frames allow specialty shapes to combine with rectangle windows
